DEAR LBC

Thanks for the chance to respond on KESA. The areas outside of Homer is growing in leaps & bounds, it seems the town is sorely tapped in just meeting its own needs & the needs of its recently acquired areas. I believe the need for fire & emergency response in the outlying areas are important. We outlying residents are still in need & hoping for such action. Losing tax base to the city in no way helps our situation. Being in a more rural setting, creates a slower response time from Homer & a need for equipment that can navigate less developed roads that see a lot more snow & mud in the changing seasons.

Thank You

Sincerely

Mike Ryan
